DETAILED ACTION

Claims 1-35 and 70 have been cancelled.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. **Claims 66-69** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not adequately describe the structure that corresponds to first and second call control units.
3. **Claim 72** is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original specification does not adequately describe the structure that corresponds to the claimed means.
4. **Claims 66-69 and 72** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. For **claims 66-69**, it is not clear what is meant by a first call control unit and a second call control unit.

6. For **claim 72**, it is not clear what is meant by an establishing means and a switching means.

Allowable Subject Matter

7. **Claims 36-65 and 71** are allowed.

Response to Arguments

8. The arguments with respect to the specification being enabling and definite for a first and a second call control units are not persuasive because the cited portion of the specification (page 6 lines 10-13) describes what is considered to be a network element (apparatus). The cited portion does not describe the structure that corresponds to the call control units that are connected to first and second interfaces.

9. The arguments with respect to the specification being definite for an establishing means and a switching means are not persuasive. The CAFC has held that "...providing specificity as to structure [cannot be avoided] simply because someone of ordinary skill in art would be able to devise means to perform claimed function." *Blackboard Inc. v. Desire2Learn Inc.*, 91 USPQ2d 1481 (Fed. Cir. 2009).

10. The arguments with respect to the specification being enabling for an establishing means and a switching means are not persuasive. The Applicant has not factually demonstrated the disclosure is sufficient because the cited portion of the disclosure does not describe the structure that corresponds to the call control units that are connected to first and second interfaces.

Applicant's arguments filed 06/10/2009 have been fully considered but they are not persuasive, for the reasons stated above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
